github.com/premwizard — mpreportfolio2610.netlify.app — Coimbatore, Tamil Nadu, India

Summary: AI Engineer with experience building LLM-powered applications, multi-agent systems, and RAG solutions. Built production-ready AI systems using Python, Flask, LangChain, and Gemini API, reducing AI prototype generation time by 60% and automating workflows that saved 3+ hours per week.

Skills

- **Programming Languages:** Python, SQL, JavaScript
- **AI & Machine Learning:** LLMs, RAG, LangChain, Generative AI, Prompt Engineering, Ollama, Gemini API, Pandas
- **Backend Technologies:** Flask, REST APIs, Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB, MySQL, Supabase, Firebase
- **Tools & Deployment:** GitHub Actions, Git, GitHub, Vercel, Render

Projects

SynapseAI GitHub | Live 2026

- Built a full-stack multi-agent AI platform converting natural language into production-ready responsive websites, orchestrating **8+ specialized agents** across intent analysis, RAG-based retrieval, design planning, code generation, and validation.
- Delivered real-time streaming and live preview via SSE and WebContainer sandboxing with Monaco editor and Supabase auth, cutting UI development time by **60%**.

Automated Individual Daily Work Reporting System GitHub | Live 2026

- Developed an automated employee activity tracking platform integrating GitHub Webhooks, Google Sheets, PostgreSQL, and WhatsApp automation workflows.
- Built centralized automation pipelines for real-time activity monitoring and scheduled reporting, reducing manual reporting effort by 3+ hours weekly.

AI Job Finder — Automated Job Aggregation & Alert System GitHub | Live 2026

- Built an AI-powered Career Operating System combining multi-agent orchestration, RAG, and semantic search for personalized job discovery, resume optimization, and ATS/skill-gap analysis.
- Engineered hybrid retrieval pipelines with vector embeddings and MCP-based integrations across GitHub, Gmail, Calendar, and Drive, enabling continuous, automated opportunity monitoring.

Internships

AI Engineer Intern — ECLearnix Edtech Pvt Ltd, Coimbatore Apr 2026 – Jul 2026

- Developed 3 production-ready AI applications using LLMs, RAG, and Flask, reducing internal development effort by 60%. Built an MCP-based AI platform, Text-to-Design system, and workflow automation solutions that improved development efficiency.

Machine Learning Intern — EMGLITZ Technologies, Coimbatore Dec 2024 – Jan 2025

- Built classification models on real-world datasets, improving validation accuracy through feature engineering and preprocessing.

Certifications

- Azure AI Apps & Agents Developer Associate
- Azure AI Fundamentals
- Prompt Design in Vertex AI
- Databricks GenAI Fundamentals
- Introduction to LangSmith

Education

• **B.E. Computer Science and Technology** 2022 – 2026
SNS College of Engineering, Coimbatore CGPA: 8.17
